Data Analyst | AI Engineer | Frontend Developer | Month-by-Month Plan

The Complete Roadmap

- | | |
|----|--|
| 01 | The 5-Month Timeline: Month-by-Month Overview |
| 02 | Pick Your Track: Data Analyst vs AI Engineer vs Frontend Developer |
| 03 | Month 1-3: Skills, Certifications & Projects (Track-Wise) |
| 04 | Certifications That Actually Get Noticed |
| 05 | Job Simulations: Add Real Experience Without Internship |
| 06 | Projects That Make Interviewers Say Yes |
| 07 | Month 4: Resume, LinkedIn & Personal Brand |
| 08 | Month 5: Applications, Outreach & Automation |
| 09 | The Claude Automation Workflow (Fetch → Match → Resume) |
| 10 | HR Outreach: Get Interviews 3x Faster |
| 11 | Resume Examples & Templates |
| 12 | Book 1:1 Career Guidance + Your Next Step |

01. The 5-Month Timeline

Here's your 5-month roadmap at a glance. Each month has a clear goal. Miss a month, and the whole timeline shifts. Stay on track, and you'll be interviewing by Month 5.

Month	Goal	What You'll Do	Deliverable
Month 1	Learn Core Skills	Pick your track. Learn the foundational tools. Complete your first certification.	1 cert done + 50% of core skills learned
Month 2	Build Proof	Complete 2 job simulations. Build Project #1. Get 2nd certification.	2 simulations + 1 project + 2 certs total
Month 3	Go Deep	Build Project #2. Complete remaining certs. Start LinkedIn posting.	2 projects + 3-4 certs + LinkedIn active
Month 4	Package Yourself	Build ATS resume. Overhaul LinkedIn. Start personal branding. Set up automation.	Resume done + LinkedIn polished + automation live
Month 5	Land Interviews	Aggressive applications. HR outreach. Use Claude automation. Mock interviews.	10-15 quality apps/week + 3-5 interviews + offer

KEY MOVE: This plan assumes 2-3 hours per day on weekdays and 4-5 hours on weekends. If you can do more, you'll finish faster. If you can only do 90 minutes, extend to 7 months. The **SEQUENCE** matters more than the speed. Don't skip Month 1-3 and jump to applications.

02. Pick Your Track

	Data Analyst	AI Engineer	Frontend Developer
CTC Range	6 - 12 LPA	8 - 15 LPA	7 - 14 LPA
Core Skills	SQL, Python (Pandas), Power BI/Tableau, Excel, Statistics	Python, ML/DL (PyTorch/TF), LLMs, Prompt Engineering, Cloud (AWS)	React/Next.js, TypeScript, CSS, REST APIs, Git
Must-Know Tools	SQL, Power BI, Excel, Python	Python, HuggingFace, LangChain, Claude API, AWS	React, Tailwind, Figma, Vercel, VS Code
AI-Era Skills	Claude for data analysis, AI-assisted dashboards, prompt-to-SQL	RAG, fine-tuning, Claude API, prompt engineering, AI agents	AI-assisted coding (Claude Code, Cursor), AI UI components
Hiring Volume	Very High	High and Growing Fast	High
Best For	B.Com, BBA, B.Tech, M.Sc with analytical mindset	B.Tech CSE/IT, M.Tech with ML interest	B.Tech, BCA, self-taught developers
Job Titles	Data Analyst, BI Analyst, Analytics Associate, MIS Analyst	AI/ML Engineer, GenAI Developer, Prompt Engineer, Data Scientist	Frontend Developer, React Developer, UI Engineer, Full-Stack

PRO TIP: If you're confused, go with Data Analyst. Highest hiring volume, most accessible skill requirements, and the fastest path to 8-10 LPA. You can always pivot to AI or Frontend once you're employed and earning.

03. Month 1-3: Skills, Certs & Projects (Track-Wise)

TRACK A: Data Analyst (Month 1-3 Plan)

Month	Skills to Learn	Certification to Complete	Project to Build
Month 1	SQL (joins, windows, CTEs) + Excel (VLOOKUP, Pivot, VBA) + Python basics (Pandas)	Google Data Analytics (Coursera) — audit for free	SQL practice: 50 problems on HackerRank
Month 2	Power BI (DAX, data modeling, dashboards) + Statistics basics + Claude for data analysis	OneRoadmap Data Analyst Certification (oneroadmap.io/skills)	Project #1: Sales Dashboard (Power BI + SQL)
Month 3	Tableau + Advanced SQL + Prompt engineering for data + Job simulation	Claude Certified Architect or AWS AI Practitioner	Project #2: Customer Churn Analysis (Python + Power BI)

TRACK B: AI Engineer (Month 1-3 Plan)

Month	Skills to Learn	Certification to Complete	Project to Build
Month 1	Python (advanced) + ML fundamentals (scikit-learn) + Prompt engineering basics	AWS AI Practitioner	ML practice: 5 Kaggle notebooks
Month 2	LLMs + RAG (LangChain/LlamaIndex) + Claude API + Vector databases	Claude Certified Architect	Project #1: RAG Chatbot (LangChain + ChromaDB + Claude)
Month 3	MLOps basics + Deployment (FastAPI) + Advanced prompting + Job simulation	AWS Data Engineer Associate or Google Cloud AI	Project #2: AI Agent with tool use (Claude API + web search)

TRACK C: Frontend Developer (Month 1-3 Plan)

Month	Skills to Learn	Certification to Complete	Project to Build
Month 1	HTML/CSS + JavaScript (ES6+) + React basics + Git	Meta Frontend Developer (Coursera)	3 mini projects: landing page, calculator, weather app
Month 2	React (hooks, context, router) + TypeScript + Tailwind + REST APIs	OneRoadmap Frontend Certification (oneroadmap.io/skills)	Project #1: Full-stack task manager (React + API + auth)
Month 3	Next.js + deployment (Vercel) + Claude-assisted coding + Job simulation	AWS Cloud Practitioner	Project #2: AI-powered portfolio with chatbot (Next.js + Claude API)

04. Certifications That Actually Get Noticed

Not all certifications are equal. Here are the ones that actually move the needle on your resume and in recruiter keyword searches. Pick 3-4 from your track.

Certification	Provider	Cost	Impact on Hiring (1-10)	Best For Track
Claude Certified Architect	Anthropic	Paid	9/10 — Very new, very in-demand. Shows AI fluency at a deep level.	AI Engineer, Data Analyst
AWS AI Practitioner	Amazon	~\$75	8/10 — Entry-level AI + AWS. Recruiters search for this keyword.	AI Engineer, Data Analyst
AWS Data Engineer Associate	Amazon	~\$150	8/10 — For data pipeline roles. Growing demand.	AI Engineer, Data Analyst
Google Data Analytics	Coursera (Google)	Free (audit)	7/10 — Globally recognized. Covers SQL, R, Tableau.	Data Analyst
Meta Frontend Developer	Coursera (Meta)	Free (audit)	7/10 — React-focused. Meta brand on resume.	Frontend Developer
AWS Cloud Practitioner	Amazon	~\$100	7/10 — Baseline cloud cert. Every recruiter knows it.	All tracks
Power BI (PL-300)	Microsoft	~Rs 4,800	8/10 — Industry standard BI tool. Almost mandatory for DA roles.	Data Analyst
OneRoadmap Skill Certifications	OneRoadmap	Free	7/10 — Practical, project-based, Big 4 and startup aligned.	All tracks

Certification links:

OneRoadmap Skills & Certifications: oneroadmap.io/skills

AWS Certifications: aws.amazon.com/certification

Claude Certified: anthropic.com (check certification page)

WHY THIS WORKS: The Claude Certified Architect certification is the highest-impact certification in 2026 for anyone in AI or data. It's new, it's from Anthropic (makers of Claude), and very few people have it yet. Getting certified NOW puts you ahead of 99% of freshers. The scarcity makes it valuable.

05. Job Simulations: Add Real Experience

The biggest problem freshers face: 'No experience.' Job simulations solve this. They give you realistic work scenarios from real companies that you can list on your resume as practical experience. Not an internship, but the next best thing.

OneRoadmap Job Simulations

OneRoadmap's Job Simulation platform gives you real-world scenarios modeled on actual company work: Data Analyst at a Big 4 firm, AI Engineer building RAG systems, Frontend Developer shipping features. Each simulation produces graded deliverables you can add to your resume and portfolio.

Start free: oneroadmap.io/job-simulation

How to Use Simulations on Your Resume

Don't just write 'Completed OneRoadmap Data Analyst Simulation.' Write: 'OneRoadmap Data Analyst Simulation: Analyzed 50K retail transactions using SQL and Power BI. Built executive dashboard tracking 12 KPIs. Identified 3 revenue-leak patterns saving estimated 8% in operational costs.' Specific. Quantified. Believable.

Complete 2 simulations during Month 2-3. One from your primary track and one from a related track. This gives you breadth that stands out.

06. Projects That Make Interviewers Say Yes

Track	Project 1 (Month 2)	Project 2 (Month 3)	How to Present
Data Analyst	Sales/Revenue Dashboard: Power BI + SQL + Python. Real dataset from Kaggle. 12 KPIs. Drill-downs. 'So what?' section.	Customer Churn Prediction: Python + ML model + Power BI viz. 50K rows. 85%+ accuracy. Business recommendations.	GitHub repo + Tableau Public/Power BI link + 1-page slide deck
AI Engineer	RAG Chatbot: LangChain + ChromaDB + Claude API. Upload documents, ask questions, get answers with source citations.	AI Agent: Claude API + tool use. Agent that searches web, analyzes data, and generates reports autonomously.	GitHub repo + deployed demo (Streamlit/Hugging Face) + README with architecture diagram
Frontend Developer	Full-Stack Task Manager: React + Node.js + MongoDB. Auth, CRUD, responsive, deployed on Vercel.	AI Portfolio Website: Next.js + Claude API chatbot. Visitors can ask about your skills and projects via embedded AI chat.	GitHub repo + live deployed URL + Lighthouse score screenshot

Every project MUST have: (1) GitHub repo with clean README (problem, approach, tech stack, how to run, screenshots), (2) Live demo or deployed link, (3) Quantified outcomes ('analyzed 50K rows,' 'achieved 87% accuracy,' 'loads in under 2 seconds'). If any of these are missing, the project is incomplete for job search purposes.

07. Month 4: Resume, LinkedIn & Personal Brand

ATS Resume (The #1 Priority)

Your resume is the single document that determines whether you get an interview or not. Don't use Word templates. Don't use fancy designs. Build an ATS-optimized resume that passes automated screening at TCS, Infosys, Deloitte, startups, and everywhere in between.

Build Your Resume for Free

ThePerfectResume.ai builds ATS-optimized resumes designed for Indian freshers. It handles formatting, keyword injection, and structure. Built by the OneRoadmap team.

Build yours: theperfectresume.ai

Resume examples & templates: theperfectresume.ai/resume-examples

LinkedIn Personal Brand (Start Week 1 of Month 4)

1

Fix Your Profile

Photo, headline ('Data Analyst | SQL, Power BI, Python | Open to Opportunities'), About section (3 paragraphs: what you do, what you've built, what you're looking for), Featured section with projects and certifications.

2

Post 3x Per Week

Share what you're learning, project updates, certification achievements, industry insights. Use the format: hook line + personal story + lesson + question. Don't be salesy. Be genuine.

3

Engage 10x Per Day

Comment thoughtfully on 10 posts from people in your target industry. Not 'Great post!' but actual value-adding comments. This gets you visibility faster than posting alone.

4

The 'Building in Public' Advantage

Document your 5-month journey publicly. 'Day 45 of my Data Analyst prep: just built my first Power BI dashboard. Here's what I learned.' People root for builders. Recruiters notice consistency.

08. Month 5: Applications, Outreach & Automation

Month 5 is execution mode. Your skills are built. Your projects are live. Your resume is ready. Now it's about getting in front of the right people as fast as possible.

The 3-Channel Application Strategy

A

Direct Portal Applications (40% of effort)

Apply through company careers pages, Naukri, LinkedIn Jobs, Wellfound, Instahyre. Target 5 quality applications per day, each customized. Use [theperfectresume.ai](#) to tailor your resume for each company.

B

HR & Recruiter Outreach (40% of effort)

Don't wait for companies to find you. Find hiring managers and recruiters on LinkedIn. Send personalized messages. This channel has 3-5x higher response rate than portal applications. Chapter 10 covers the exact templates.

C

Claude Automation (20% of effort)

Use the Claude + Apify + ThePerfectResume automation workflow. Claude fetches 50 jobs, ranks them against your profile, builds tailored resumes, and drafts outreach emails. Chapter 9 covers the full setup.

Weekly Targets for Month 5

Activity	Weekly Target	Expected Output
Portal applications (customized)	25 per week (5/day)	2-3 callbacks
LinkedIn HR outreach messages	15 per week	2-3 responses
Claude automation runs	2 per week (different roles/cities)	100 jobs analyzed, top 10 matched
LinkedIn posts	3 per week	Growing visibility + inbound interest
Mock interviews	2 per week	Interview readiness
Follow-ups on previous applications	10 per week	1-2 additional callbacks

09. The Claude Automation Workflow

Set this up once. Run it every week. Claude fetches jobs from LinkedIn and Naukri, matches them to your skills, builds a tailored resume using ThePerfectResume MCP, and drafts outreach emails.

Setup (One-Time, 15 Minutes)

1

Connect Apify to Claude

claude.ai > Settings > Connectors > Search 'Apify' > Connect with API token from apify.com. Add scrapers: worldunboxer/rapid-linkedin-scraper and jupri/naukri.

2

Connect The Perfect Resume MCP

Claude Settings > Connectors > Add Custom MCP > Name: The Perfect Resume > URL: <https://www.thepperfectresume.ai/api/mcp> > Authorize.

3

Connect Gmail (Optional)

Claude Settings > Connectors > Search 'Gmail' > Connect > Authorize for draft creation.

Weekly Run (2 Prompts, 10 Minutes)

Prompt 1: Upload resume + paste career context. Claude builds your profile.

Prompt 2: 'Using Apify scrapers, fetch 50 [ROLE] jobs in India from last 7 days. Rank top 5 against my profile. Build ATS resume for #1 match using Perfect Resume. Draft Gmail outreach for any with recruiter email.' Claude does everything automatically.

RESOURCE: Full automation workflow guide available in our separate PDF: 'Claude Job Automation Workflow.' It includes the complete prompts, connector setup URLs, troubleshooting, and the behind-the-scenes data flow. Ask for it in your 1:1 session at oneroadmap.io/skills.

10. HR Outreach: Get Interviews 3x Faster

Direct outreach to recruiters and hiring managers gets 3-5x more responses than portal applications. Here are the exact templates.

LinkedIn Connection Request (Under 300 chars)

Hi [Name], I'm a [2026 graduate / career switcher] targeting [Data Analyst / AI Engineer / Frontend] roles. I've built [one specific project in one line] and have [key cert]. Would love to connect and explore opportunities at [Company]!

Follow-Up After They Accept

Hi [Name], thanks for connecting! I saw [Company] is hiring [role]. I've completed [2 certifications: Claude Certified + AWS AI] and built [project with quantified outcome]. My resume is tailored for this role (built on theperfectresume.ai). Would you be open to reviewing it? Happy to share. No pressure at all.

Cold Email to Hiring Manager

Subject: [Role] candidate with [Claude Certified + AWS AI + deployed project] Hi [Name], I'm a 2026 graduate targeting [role] roles. I've built [project with one-line description and outcome] and completed [2 key certs]. I recently finished a job simulation on OneRoadmap that mirrors real [Company] workflows. Attaching my resume (ATS-optimized on theperfectresume.ai). Would you be open to a 15-minute call? [Your Name] | [LinkedIn URL]

11. Resume Examples & Templates

Don't start from scratch. Use proven resume templates and examples from real candidates who landed 8-10 LPA roles.

Resume Examples by Role

Browse real resume examples for Data Analysts, AI Engineers, Frontend Developers, and 20+ other roles. Each example shows the exact format, bullet structure, and keyword strategy that gets callbacks.

Browse examples: theperfectresume.ai/resume-examples

Build your own: theperfectresume.ai

Resume Checklist (Non-Negotiable)

1**One page, single column, standard fonts**

No tables, no images, no graphics that break ATS parsers.

2**Headline matches your target role**

Not 'B.Tech CSE Student.' Instead: 'Data Analyst | SQL, Power BI, Python, Claude | AWS AI Certified.'

3**Certifications section ABOVE projects**

For freshers without internships, certifications are your strongest signal. Put them high.

4**Every bullet: Action Verb + What + Impact + Tool**

'Analyzed 50K transactions using SQL and Power BI, identifying 3 revenue-leak patterns saving estimated 8% in costs.'

5**GitHub + Portfolio links included**

Recruiters WILL click. Make sure they work and look clean.

12. Book 1:1 Career Guidance + Your Next Step

This guide gives you the complete roadmap. But sometimes you need someone to look at YOUR specific situation and tell you exactly what to do next. That's what the 1:1 session is for.

Book a 1:1 Career Guidance Session

Get personalized advice on your track selection, resume review, interview prep, and job search strategy. One session can save you months of guesswork.

Book here: oneroadmap.io/skills

Your Next 48 Hours

1**Pick your track**

Data Analyst, AI Engineer, or Frontend Developer. Decide today. Not tomorrow.

2**Start your first certification**

Go to oneroadmap.io/skills. Start the certification for your track. Free.

3**Register for a job simulation**

Go to oneroadmap.io/job-simulation. Pick a simulation matching your track.

4**Build your resume**

Go to theperfectresume.ai. Build v1 now. You'll improve it over 5 months. But start today.

5**Follow @thegauravghai for daily motivation**
